Residential	**$334,904,085**	**$249,051**
Employment	**$14,154,076**	**$148,062**

SUMMARY - COMMUNITY INFRASTRUCTURE LEVY		
	ESTIMATED DWELLINGS	ESTIMATED TOTAL CONTRIBUTION
Capped at $900 per dwelling	**21,516**	**$19,363,953**

1.0 INTRODUCTION

The Clyde Development Contributions Plan (the 'DCP') has been prepared by the Metropolitan Planning Authority with the assistance of City of Casey, service authorities and other major stakeholders.

The DCP:

- Outlines projects required to ensure that future residents, visitors and workers in the area can be provided with timely access to infrastructure and services necessary to support a quality and affordable lifestyle.
- Establishes a framework for development proponents to make a financial contribution towards the cost of the identified infrastructure projects. It ensures that the cost of providing new infrastructure and services is shared equitably between various development proponents and the wider community.
- Provides the details of the calculation of financial contributions that must be made by future developments towards the nominated projects. In this way, it provides developers, investors and local communities with certainty about development contributions requirements and how these will be administered.

1.1 Report structure

PART 1

Part 1 describes the strategic basis for the Development Contributions Plan.

PART 2

Part 2 sets out the justification for the various infrastructure projects included in the Development Contributions Plan.

PART 3

Part 3 sets out how the development contributions are calculated and costs apportioned.

PART 4

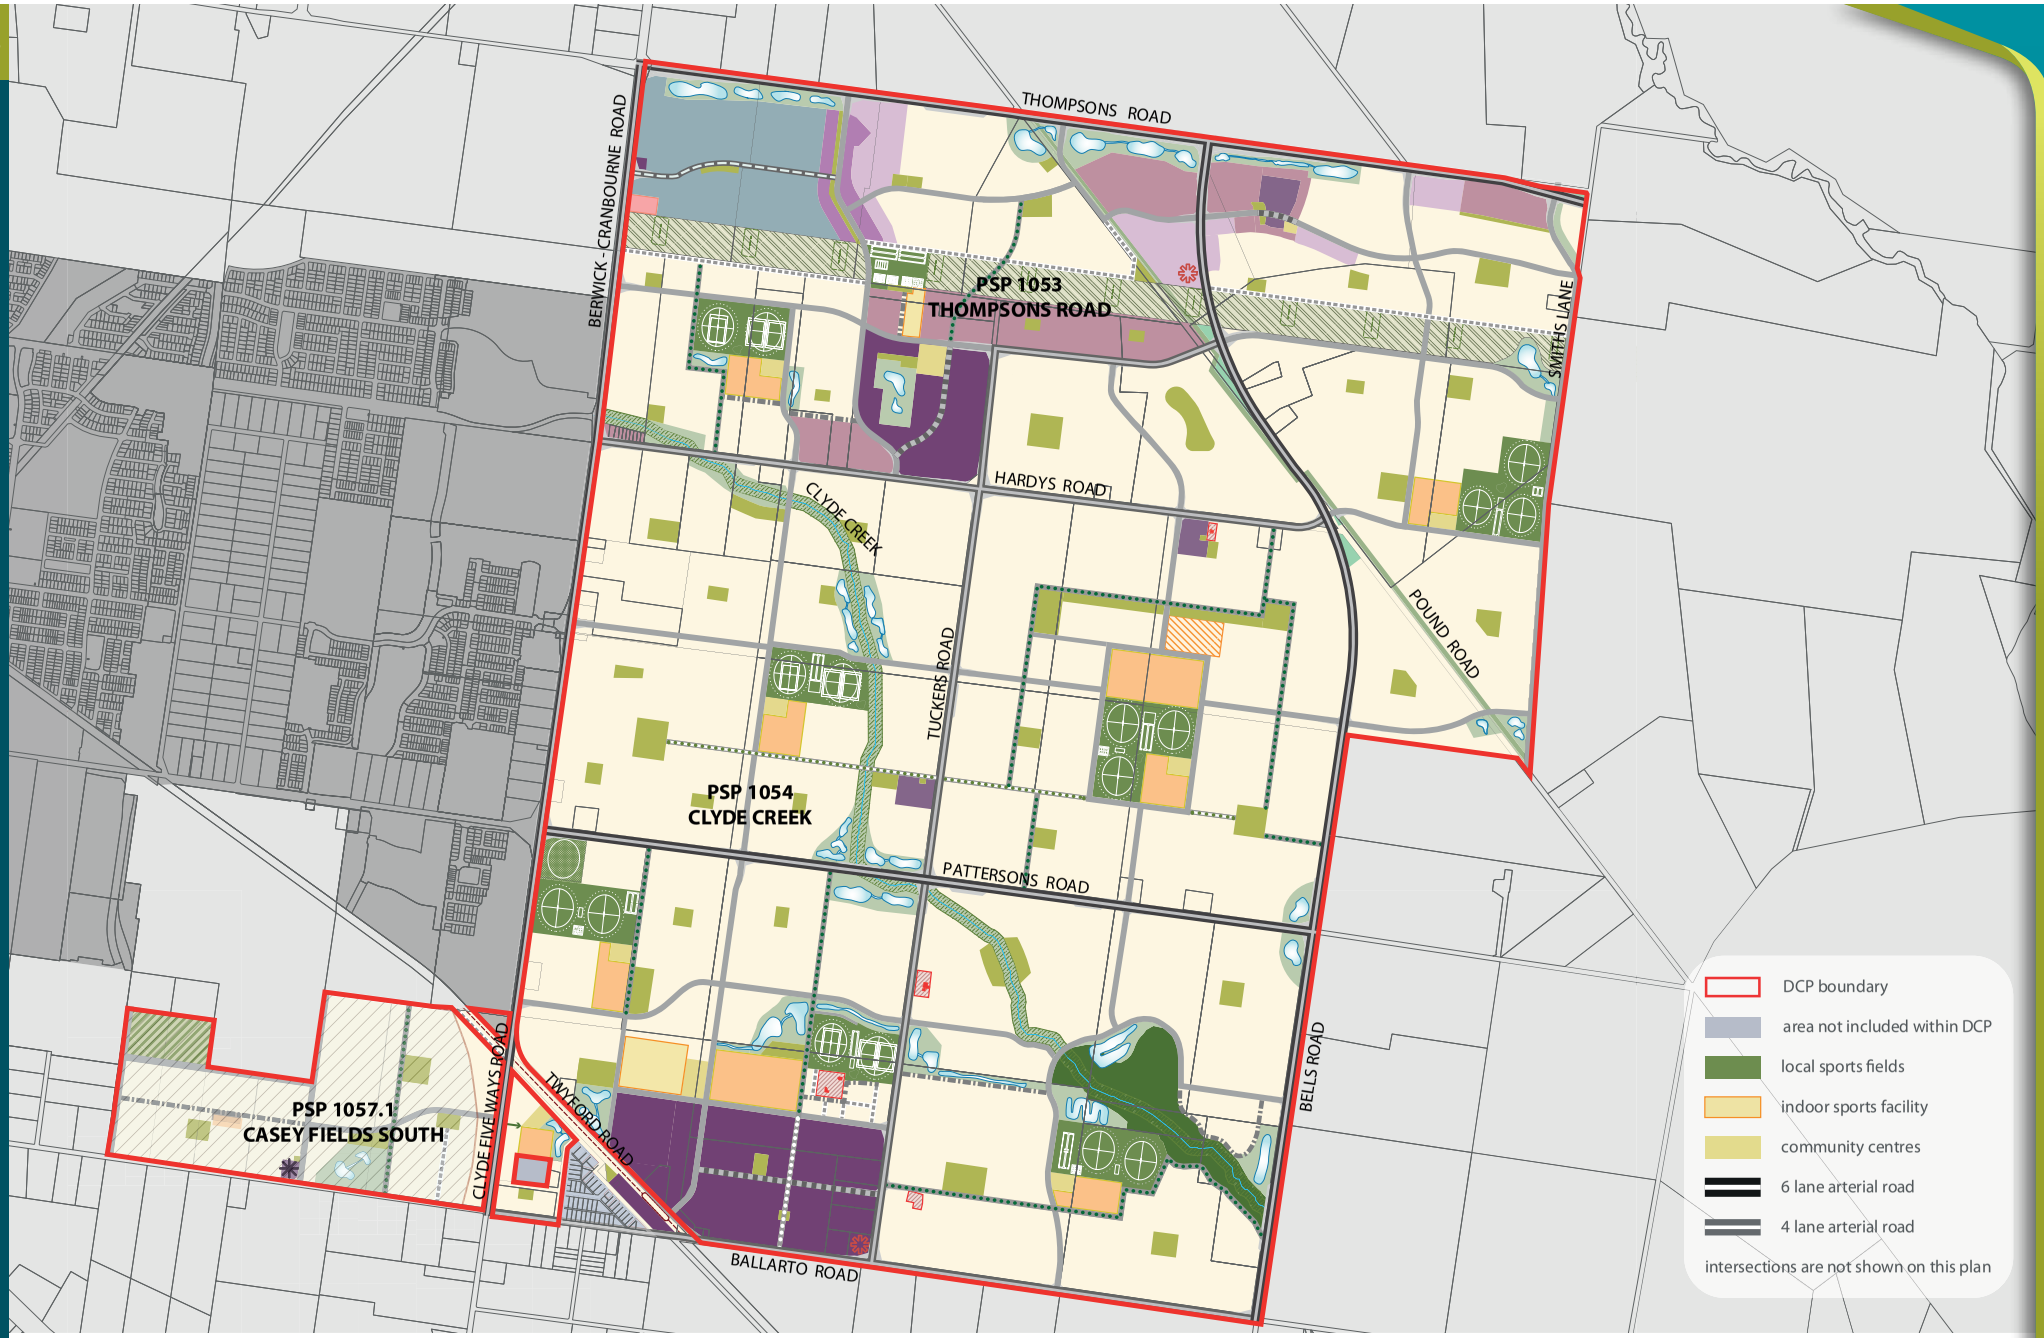
Part 4 focuses on administration and implementation of the Development Contributions Plan.

PART 5

Part 5 focuses on implementation of the Development Contributions Plan and identifies infrastructure delivery priorities.

PART 6 and 7

Parts 6 and 7 provide further information on projects, including cost estimate breakdowns, and appendices.



plan 1_future urban structure
clyde development contributions plan

1.2 Strategic basis

The strategic basis for the DCP is established by the State and Local Planning Policy Framework of the Casey Planning Scheme. The key documents are the:

- Growth Corridor Plans.
- Municipal Strategic Statement.
- Thompsons Creek Precinct Structure Plan.
- Clyde Creek Precinct Structure Plan.
- Casey Fields South Precinct Structure Plan.

These documents set out a broad, long term vision for the sustainable development of the DCP area and its surrounds.

The Growth Corridor Plans illustrate the planned extent of residential, employment and other development as well as the location of larger activity centres for each growth area. They also include key elements of infrastructure and services such as the regional open space network, metropolitan public transport networks, freeways and arterial roads.

The DCP is implemented in the Casey Planning Scheme through Schedule 15 to the Development Contributions Plan Overlay.

1.3 Planning & Environment Act 1987

The DCP has been prepared in accordance with Part 3B of the *Planning and Environment Act 1987* (the Act) as well as other relevant legislation and has been developed in line with the State and Local Planning Policy Framework of the Casey Planning Scheme. It is consistent with the Minister for Planning's Directions on Development Contributions made under section 46M(1) of the Act and has regard to the Victorian Government's Development Contributions Guidelines (the 'DCP Guidelines').

The DCP provides for the charging of a Development Infrastructure Levy pursuant to section 46J(a) of the Act towards works, services and facilities. It also provides for the charging of a Community Infrastructure Levy pursuant to section 46J(b) of the Act as some items are classified as community infrastructure by reference to the Act, the Minister's Direction on Development Contributions and the DCP guidelines.

The DCP forms part of the Casey Planning Scheme pursuant to section 46I of the Act and is an incorporated document under Clause 81 of the Casey Planning Scheme.

Development Contributions Plan Overlay applies to the area shown in Plan 1.

1.4 Strategic planning for Clyde

The area of Clyde covered by the DCP consists of 1,440 hectares of land in the Urban Growth Zone, which was rezoned as part of the 2010 Urban Growth Boundary change.

The proximity of the three Clyde precincts to each other and their location adjacent to existing development has allowed the strategic planning of this part of the sub-corridor to proceed on an integrated basis, with each PSP considering not only its individual needs, but also how it will integrate with and relate to adjoining areas. The transport, community and recreation needs of the future community have all been considered in terms of the whole sub-corridor.

The need for the infrastructure included within the DCP has been determined according to the anticipated development of the Clyde area. The DCP has been prepared in conjunction with the three Precinct Structure Plans which provide the rationale and justification for infrastructure items that have been included. Accordingly, the DCP is an implementation based planning tool which identifies the infrastructure items required by the new community and apportions the cost of this infrastructure in an equitable manner across the plan area.

The Background Reports for the three precincts provide an overview of the planning process for the Clyde area (see relevant PSP).

METROPOLITAN PLANNING AUTHORITY

1.5 Clyde Precinct Structure Plans

The three Clyde PSPs (the PSPs) set out the vision for how land should be developed, illustrate the future urban structure and describe the outcomes to be achieved by the future development. They also list projects required to ensure that future residents, visitors and workers within the area are provided with timely access to services and transport infrastructure necessary to support a quality affordable lifestyle.

The PSPs enable urban development and the future urban structure of the new communities are depicted through a number of networks including transport, open space and local sports fields, social infrastructure, town centres, housing and places for local employment.

Amended by C208

The Thompsons Road PSP will ultimately accommodate approximately 18,035 people and 6,441 dwellings. It is also proposed to deliver 95.60 net developable hectares for employment purposes (in addition to a major town centre), with the potential to deliver 8,900 jobs in the precinct.

Amended by C208

The Clyde Creek PSP will ultimately accommodate approximately 38,109 people and 13,610 dwellings.

Amended by C208

The Casey Fields South PSP will ultimately accommodate approximately 4,100 people and 1,464 dwellings.

The wider Clyde area planning process confirmed:

- A detailed NDA for each PSP based on a survey of encumbrances and a broad allocation of community facilities.
- All road, intersection, and bridge projects required to service the new community.
- The required number of sporting reserves, schools, and community centres.

The PSPs may refine the location and layout of some items included in this DCP but do not amend the project list nor the overall levies rates.

1.6 The area to which the Development Contributions Plan applies

In accordance with section 46K(1)(a) of the *Planning and Environment Act 1987* the DCP applies to land shown in Plan 1. The area is also shown on Development Contributions Plan Overlay Schedule 15 in the Casey Planning Scheme.

Amended by C208

The DCP applies to approximately 1,440.31 Net Developable Hectares of land including two charge areas as shown in Plan 2.

Amended by C208

Table 2 Charge Areas

	AREA	LABEL
Area 1	1,344.72	Residential
Area 2	95.60	Employment

The DCP clearly demonstrates the infrastructure required to service urban development in PSPs 1053, 1054 and 1057.1. Together, the two charge areas form the Main Catchment Area ('MCA') for the various infrastructure projects. The MCA is the geographic area from which a given item of infrastructure will draw most of its use.

In selecting items, consideration has been given to ensure they are not already wholly funded through another contribution mechanism, such as a mandatory infrastructure construction requirement of the Clyde PSPs, an existing local development contributions plan, an agreement under Section 173 of the Act or as a condition on an existing planning permit. Identified overlap in funding has been addressed, for example by adjusting other relevant development contributions plans or other suitable means provided for in the *Planning and Environment Act*.

1.7 Related infrastructure agreements

A number of projects are apportioned across the adjoining DCP area of Clyde North and to the Melbourne Water Development Services Scheme, and will in the future be apportioned across the DCP areas for Casey Central, Clyde East, Clyde South, and Casey Fields South Employment.

The apportionments listed in Table 12 have taken this into consideration. Refer to Appendix 2 for details of external apportionment.

1.8 Project & property identification

1.8.1 Project identification

The project identification system used in the DCP has been designed to assist in understanding of and navigation through the document. Road, bridge, intersection, and community facility projects have used the identification system of project category, PSP number, and a sequential project number. As an example, a road project in Thompsons Road (PSP 1053) will have the project identifier similar to RD-53-01. The text below provides a summary of the project categories:

- LS = local sports fields
- P = pavilion
- IR = indoor recreation
- RD = road projects
- IN = intersection projects
- CO = community facilities
- BR = bridges and culverts

1.8.2 Property identification

Property identifiers are similar to project identifiers. Each of the properties across the sub-corridor is given a unique identifier that reflects both the PSP and geographic area within that PSP. A property in the Thompsons Road (PSP 1053) may have a property identifier similar to 53-01.

2.0 INFRASTRUCTURE PROJECT JUSTIFICATION

The need for infrastructure included in the DCP has been determined according to the anticipated development of the Clyde area.

Items can be included in a development contributions plan if they will be used by the future community of an area. New development does not have to trigger the need for new items in its own right. The development is charged in line with its projected share of use. An item can be included in a development contributions plan regardless of whether it is within or outside the DCP area.

Before inclusion in the DCP, all items have been assessed to ensure they have a relationship or nexus to proposed development in the DCP area. The cost apportionment methodology adopted in the DCP relies on the nexus principle. A new development is deemed to have a nexus with an item if its future residents or employees are expected to make use of that item.

A summary of how each item is related to proposed development within the DCP area is set out below and individual item apportionments are identified in Table 8.

The items that have been included in the DCP all have the following characteristics:

- They are essential to the health, safety and well being of the community.
- They will be used by a broad cross-section of the community.
- They reflect the vision and objectives expressed in the Clyde PSPs.
- They are not recurrent items.

2.1 Items not included in the Development Contributions Plan

The following items are not included in the DCP, as they are considered to be normal to the construction of a development and are not considered to warrant cost sharing arrangements beyond those set out in this DCP and must be provided by developers as a matter of course and in implementing the PSPs:

- Internal streets and connector streets, creek, drainage line and utility easement crossings and associated traffic management measures (except where nominated in this DCP).
- Waterway management works and drainage systems.
- Intersections connecting the development to the existing road network, except where specified as development contributions plan projects.
- Water, sewerage, underground power, gas and telecommunications services.
- Local pathways and connections to the regional and / or district pathway network.
- Shared path networks, including required crossings of waterways.
- Basic levelling, provision of biodiversity offsets, water tapping and landscaping of local active and passive open space.
- Passive public open space reserve master plans and any agreed associated works required by the PSPs.
- Council's plan checking and supervision.
- Bus stops.

These items may be further addressed and defined by an agreement under s173 of the Act and / or conditions in planning permits.

Construction of the following items has not been included within the DCP as they are determined to be State Infrastructure items:

- Subsequent carriageways of:
  - Thompsons Road;
  - Bells Road;
  - Pattersons Road;
  - Berwick-Cranbourne Road and Clyde-Five Ways Road;
  - Hardys Road;
  - Tuckers Road.
- Any grade-separated intersections.
- Clyde train station.
- Government primary or secondary schools.

The delivery of the State Infrastructure items will be provided as warranted and as funds become available, which may potentially include Growth Area Infrastructure Charge (GAIC) Work in Kind projects.

Land for the following items has not been included within the DCP:

- Existing areas affected by the Public Acquisition Overlay in the Casey Planning Scheme for Thompsons Road, Berwick-Cranbourne Road and Clyde-Five Ways Road.
- Land required for any grade-separated intersections (will be acquired through a VicRoads PAO).
- Clyde train station.

If any roads not considered a State responsibility require duplication beyond that allowed for in this DCP, this would be undertaken by Council.

This page has been intentionally left blank.

2.2 Infrastructure projects

The following three types of projects are included in the DCP (refer to Plans 3-6):

- Transport;
- Recreation;
- Community.

2.2.1 Transport projects

The transport related projects in the DCP are based on the transport network depicted in Plan 3 which is supported by the South East Growth Area Corridor Plan and the Clyde PSPs. The transport projects include a combination of:

- Road construction (including land and waterway crossing requirements); and
- Construction of major controlled intersections and associated works.

The following road and bridge projects shown in Plan 3 are funded by the DCP:

Amended by C208

Table 3 Road and Bridge Projects

DCP PROJECT ID	PROJECT TITLE PROJECT DESCRIPTION	CHARGE AREAS CONTRIBUTING	PROJECT LENGTH	HECTARES CONTRIBUTING	INDICATIVE PROVISION TRIGGER
RD- 53 -01A	Thompsons Road (Berwick-Cranbourne Road to Smiths Lane) Purchase of land to widen road reserve from 20m wide to 41m wide (ultimate treatment) and upgrade of existing carriageway for 760m, excluding intersections (interim treatment). Purchase of 0.369ha land from Clyde North $480,000 for the interim road alignment.	Residential & Employment	760	1,440.31	At time of subdivision
RD- 53 -01B	Thompsons Road (Berwick-Cranbourne Road to Smiths Lane) - Employment Purchase of land to widen road reserve from 20m wide to 41m wide (ultimate treatment) and upgrade of existing carriageway for 1100m, excluding intersections (interim treatment). The total cost includes $2,576,700 apportioned from the Clyde North DCP	Residential & Employment	1100	1,440.31	At time of subdivision
RD- 53 -02	Tuckers Road (Hardys Road to Bells Road) Purchase of land to widen road reserve from 20m wide to 34m wide (ultimate treatment) and upgrade of existing carriageway for 540m, excluding intersections (interim treatment)	Residential & Employment	540	1,440.31	At time of subdivision
RD- 53 -03A	Bells Road (Hardys Road to Thompsons Road) Purchase of land to widen road reserve from 20m wide to 41m wide (ultimate treatment) and upgrade of existing carriageway for 630m, excluding intersections (interim treatment)	Residential & Employment	630	1,440.31	At time of subdivision
RD-54-01	Hardys Road (Berwick-Cranbourne Road Road to Bells Road) Purchase of land to widen road reserve from 20m wide to 34m wide (ultimate treatment) and upgrade of existing carriageway for 1520m, excluding intersections (interim treatment)	Residential & Employment	1520	1,440.31	At time of subdivision

DCP PROJECT ID	PROJECT TITLE PROJECT DESCRIPTION	CHARGE AREAS CONTRIBUTING	PROJECT LENGTH	HECTARES CONTRIBUTING	INDICATIVE PROVISION TRIGGER
RD-54-02	Pattersons Road (Berwick-Cranbourne Road to Bells Road/eastern boundary of PSP 1054) Purchase of land to widen road reserve from 20m wide to 41m wide (ultimate treatment) and upgrade of existing carriageway for 1900m, excluding intersections (interim treatment)	Residential & Employment	1900	1,440.31	At time of subdivision
RD-54-03	Tuckers Road (Ballarto Road to Hardys Road) Purchase of land to widen road reserve from 20m wide to 34m wide (ultimate treatment) and upgrade of existing carriageway for 1730m, excluding intersections (interim treatment)	Residential & Employment	1730	1,440.31	At time of subdivision
RD-54-04	"Bells Road (Pattersons Road to Hardys Road) Purchase of land to widen road reserve from 20m wide to 41m wide (ultimate treatment) from Hardys Road to Heather Grove. Upgrade of existing carriageway for 555m, excluding intersections (interim treatment). Purchase of land to create road reserve from 0m to 20m wide (interim treatment) to join the exisiting road reserve from Heather Grove to Pattersons Road within the Clyde DCP area. Upgrade of existing carriageway for 550m, excluding intersections (interim treatment).	Residential & Employment	1105	1,440.31	At time of subdivision
RD-54-05	Valetta Road (Clyde township) Upgrade of existing carriageway for 357m and ultimate treatment	Residential & Employment	357	1,440.31	At time of subdivision

2.2.2 Recreation facility projects

The recreation contributions include:

- Provision of land for local sports reserves and indoor recreation.
- Contribution towards construction of sports facilities and landscaping in open space reserves.
- Contribution towards construction of pavilions for future sports fields.

Amended by C208

The DCP provides a contribution for the purchase of land equivalent to 5.77% of Residential Net Developable Area (NDAR) which equates to approximately 77.53 hectares across the three precincts.

The total land contribution compromises eight (8) individual reserves (three in PSP 1053, four in PSP 1054, and one in PSP 1057.1).

The DCP provides for the basic construction, surfacing, and landscaping of facilities for local sports reserves.

The detailed design and scope (as defined in Table 6) of each of the following community projects will be reviewed by the Development Agency closer to the time that they are constructed.

In reviewing the scope of the facility, the Development Agency will have regard to matters such as changing provision standards and models, the immediate needs of the community, current regulations and best practice and may adjust and refine the scope of the facility to respond to these matters.

The Development Agency may also adjust and refine the scope of the facility to reflect the capacity of any non-DCP funds that can be made available (for example from a grant or some other funding stream).

In adjusting and refining any final project scope the Development Agency will ensure that at least the same total cost of the project item (as indexed from time to time) is invested into the community facilities proposed.

The following recreation projects shown in Plan 5 are funded by the DCP:

2.2.3 Community facility projects

The community projects include:

- Land and construction of Level 1 community centres incorporating a triple kindergarten throughout the PSPs.
- Land for Level 3 community centres

The community projects are based on the projections determined through the sub-corridor planning process, consistent with the range of facilities and provision ratio set out in research undertaken by the Metropolitan Planning Authority and City of Casey. The community facilities defined in these projects are the best estimates of the future requirements and specifications of the future Clyde community.

The detailed design and scope (as defined in Table 6) of each of the following community projects will be reviewed by the Development Agency closer to the time that they are constructed.

In reviewing the scope of the facility, the Development Agency will have regard to matters such as changing provision standards and models, the immediate needs of the community, current regulations and best practice and may adjust and refine the scope of the facility to respond to these matters.

The Development Agency may also adjust and refine the scope of the facility to reflect the capacity of any non-DCP funds that can be made available (for example from a grant or some other funding stream).

In adjusting and refining any final project scope the Development Agency will ensure that at least the same total cost of the project item (as indexed from time to time) is invested into the community facilities proposed.

The following community projects shown in Plan 6 are funded by the DCP:

2.3 Project Timing

Each item in the DCP has an assumed indicative provision trigger specified in tables 3 to 6. The timing of the provision of the items is consistent with information available at the time that the DCP was prepared. The Council, as Development Agency, will monitor and assess the required timing for individual items and have regard to its capital works program, the staging of the PSPs and areas external to the DCP Area.

The Collecting Agency may consider alternatives to the priority delivery of works or land where:

- Infrastructure is to be constructed / provided by development proponents as works or land in kind, as agreed by the Collecting Agency.
- Network priorities require the delivery of works or land to facilitate broader road network connections.
- Community needs determine the delivery of works or land for community facilities or active open space.

All items in this DCP will be provided as soon as is practicable and as soon as sufficient contributions are available, consistent with Section 4.1 and acknowledging the Development Agency's capacities to provide the balance of funds not recovered by this DCP.

All items included in the DCP will be provided within 30 years from the date upon which this DCP was first incorporated in to the Casey Planning Scheme.

2.4 Distinction between Development and Community Infrastructure

In accordance with the *Planning and Environment Act 1987* and the Ministerial Direction on Development Contributions, the DCP makes a distinction between 'development' and 'community' infrastructure.

The timing of payment of contributions is linked to the type of infrastructure in question.

The community infrastructure levy contributions are made by the home builder at the time of building approval (unless an alternative time is agreed between the collecting agency and a development proponent). Community infrastructure levy contributions will be paid for at a 'per-dwelling' rate. The *Planning and Environment Act 1987* currently stipulates that the amount that may be contributed under a community infrastructure levy is no more than $900 per dwelling. The Governor in Council may from time to time by Order published in the Government Gazette vary the maximum amount that may be collected by the Community Infrastructure Levy. If in the future the Community Infrastructure Levy is amended, then the levy applicable to the release of the remaining dwellings may be adjusted in accordance with the revised legislative and regulatory approach as directed by the Minister for Planning.

The projects listed in Table 7 are deemed to be community infrastructure levy projects.

All other infrastructure projects are considered to be development infrastructure projects.

Contributions relating to development infrastructure are to be made by developers at the time of subdivision. If subdivision is not applicable payments must be made prior to construction works.

3.0 CALCULATION OF CONTRIBUTIONS

The general cost apportionment method includes the following steps:

- Calculation of the Net Developable Area ('NDA') and demand units (refer Table 8).
- Calculation of project costs (refer Tables 10 and 11).
- Identification and allowance for external apportionment (refer Table 12).
- Cost apportionment and catchments (refer Table 1).
- Identification of development types required to pay the levy (refer Table 2).
- Calculation of costs payable for each infrastructure project (refer Tables 10 and 11).
- The development infrastructure charge per hectare for each development type and the community infrastructure levy per dwelling (refer Table 14).

3.1 Calculation of Net Developable Area and Demand Units

The following section sets out how NDA is calculated and outlines the development projections anticipated for the area. Calculations of NDA for each individual property is outlined in the property-specific land budget included within the relevant PSP.

3.1.1 Net Developable Area

In this DCP, all development infrastructure contributions are payable on the net developable area of land on any given development site.

For the purposes of this DCP the NDA is defined as the total amount of land within the precinct that is made available for development of housing and employment buildings, including lots, all connector and local streets. It is the total precinct area minus community facilities, educational facilities, open space, encumbered land and arterial roads. Any additional small local parks defined at the subdivision stage are included in the NDA.

The NDA for the DCP has been calculated in Table 8 to ensure the levies are properly apportioned.

Further to assist with the property project apportionment, NDA levies being further broken down as Net Developable Area Employment (NDA-E) and Net Developable Area Residential (NDA-R). NDA-E and NDA-R added together equal the total NDA.

3.1.2 Land Budget and Demand Units

Net developable hectare is the demand unit for this DCP.

Based on the Clyde PSPs, there is one development type included in this DCP: Urban Development. Urban Development is defined broadly to include all forms of development, including residential subdivision, development within the local town centres, convenience centres and employment areas. Urban Development also includes any non-residential uses within the residential area such as a place of worship, education centre, retirement village, nursing home, child care centre, medical centre or convenience store or any other approved use. There is a total of 1440.31 Net Developable Hectares in the DCP area.

Amended by C208

It is important to note that the number of Net Developable Hectares (that is the demand units) in each charge area is based on the land budgets in Table 8.

The 'per Net Developable Hectare' contributions will not and must not be amended to respond to minor changes to land budgets that may result from the subdivision process. In other words, the DCP is permanently linked to the calculation of Net Developable Area set out in the detailed land budget in Table 8.

For the purposes of the DCP, the number of developable hectares will only change if the Collecting Agency agrees to a variation to the Precinct and detailed land budget and associated tables.

3.1.3 Property Specific Calculations

The NDA in the summary land use budget (Table 8) used to calculate the contributions within the DCP has been based on an assessment of land use within individual properties. The property specific land budget included within each PSP should be used to determine the number of developable hectares (for DCP purposes) on individual parcels.

The property specific NDA and rates listed in this DCP determine the total contribution for each property.

3.1.4 Public Open Space Contributions

Overall public open space for residential areas NDA-R is 9.83%, comprised of 5.77% as sporting fields and 4.07% NDA-R. Employment areas comprise 1.85% for local parks.

Amended by C208

This DCP funds the acquisition of land for local sports fields of NDA-E and contributes towards the construction of sporting surfaces. Local parks are provided through Clause 52.01 of the Scheme and no contribution for local parks is included in this DCP.

Works that a landowner must undertake prior to the handover of land to Council (as specified in the relevant PSP) can be considered to be eligible for a partial works in kind credit as per Section 5.3.3 where these works are not considered to be temporary works.

3.2 Calculations of Contributions Charges

3.2.1 Calculation of Costs

Each project has been assigned a land and / or construction cost. These costs are listed in Table 10. The costs are expressed in September 2015 dollars and will be indexed in accordance with the indexation method specified in Section 4.3.

Amended by C208

3.2.2 Road Construction and Intersection Works

Cardno Victoria have prepared the estimated costs for the transport projects within the DCP. The scope for intersection projects was established collaboratively with Vic Roads and the City of Casey in consideration of traffic advice provided by Aecom and Cardno Victoria.

Road construction and intersection costs were derived from concept functional designs which were overlaid onto topographical data and existing conditions in an AutoCAD system. This enables the provision of accurate and detailed component costing as shown on the data sheets in Section 7.0. A number of standardised intersections were developed in collaboration with the GAA, VicRoads and Council to be used in this DCP.

Rates for the works have been established by using current road construction estimation rates as of April and August 2015.

Amended by C208

The intersection layout was agreed with the relevant road authority as were the scope of works. The general assumptions used were:

- No land acquisition costs have been allowed for unless stated (these are separately identified in each DCP project costing in Table 10).
- No trunk services have been allowed for.
- Drainage allowance is for 'road reserve or project land' areas i.e. no external catchments. However, major drainage such as culverts or bridges consistent with the Clyde PSPs have been included as separate projects.
- A standard excavation depth has been allowed for. Final pavement requirements will be determined at construction stage responding to actual ground conditions.
- Where required an allowance has been made for existing services adjustment or relocation (e.g. electricity poles, water fittings, manholes etc)

Additional percentage based costs tailored to each individual project have been included for:

- Traffic management.
- Field survey and detail design fees.
- Construction overheads and supervision.
- Contingency.

The level of contingency for each project reflects the level of design resolution achieved at the time the DCP was prepared. The costs are fully detailed including, for example, street trees, road line marking, footpaths and street lighting.

With respect to road / intersection construction along existing road alignments:

- Most difficulties along the alignment will have been dealt with or built around due to the existing road, therefore upgrading of the pavement will have no effect or only a minor effect on in-ground or underground assets.
- Higher levels of traffic management and service relocation have been allowed for.

With respect to road / intersection construction for green field alignments:

- Design generally follows natural terrain.
- Existing service alterations have been included and would be minimal.
- Major cost items such as Melbourne Water drainage culverts have been allowed for as separate items.

With respect to road / intersection construction along the existing alignment of Thompsons Road:

- The DCP will provide for the first carriageway to be delivered; the Clyde North DCP will contribute funding equivalent to a rural seal of Thompsons Road from Berwick-Cranbourne Road to Pound Road.

Where possible, arterial road works as funded by this DCP have been designed to minimise any redundant works that are required in the ultimate delivery of future arterial roads.

3.2.3 Culvert works

Where there is a road crossing of a natural waterway the cost estimated for the culverts required has been prepared on a site by site basis.

3.2.4 Recreation works

Recreation cost estimates have been prepared on a per reserve basis. The per hectare rate has been derived from an analysis of previous recreation project cost estimates. The use of a per hectare rate allows Council a greater degree of flexibility to meet the needs of the future community.

3.2.5 Community Centre Projects

The concept and costing for level 1 facilities is based on cost estimates previously prepared by PQS for the DCP's in the Casey sub-corridor and applied to the Clyde DCP. Costing allowance for level 3 facilities is based on a level 1 cost and additional library cost from Wyndham West DCP.

3.2.6 Interim and Temporary works

Interim works are not (except in the case of interim and temporary community facility projects as identified in Table 9) allowed as costs against this DCP unless expressly listed in the DCP, and nor will temporary works unless to the satisfaction of the responsible authority.

3.2.7 Interim and temporary community facility projects

This DCP allows the Development Agency to meet the immediate needs of the community in advance of the delivery of the permanent community facility projects identified in this DCP by allowing the provision of listed interim and temporary works as costs against the DCP.

No additional allowance for the cost of these interim and temporary works has been made in the DCP.

Where possible, any required/planned interim and temporary works should constitute part of the design of a permanent community facility project funded by the DCP and reduce the cost to complete that design, or be reimbursable when the interim and temporary works are no longer required.

Where the provision of interim and temporary works does not reduce the cost of delivering a permanent community facility project funded by the DCP, non DCP funds (for example from the sale of a temporary asset, augmented from Council funds, a grant or some other funding stream) will be invested into the permanent project to ensure that at least the same total cost of the project item (as indexed from time to time) is invested into the project.

The Development Agency must ensure that the provision of interim and temporary works as costs against the DCP does not undermine the Development Agency's ability to provide the permanent community facility projects identified in this DCP as soon as is practicable.

The following interim and temporary works may be allowed with approval of the development agency as costs against this DCP:

Table 9 Interim and temporary community facility projects

PROJECT TITLE – INTERIM FACILITIES	PROJECT DESCRIPTION – INTERIM FACILITIES	INDICATIVE LIFESPAN FROM CONSTRUCTION
Community meeting space	Relocatable building or convertible building on Council or private land	5 years
Early childhood facility	Mobile maternal and child health service	5 years
Playgroup space	Fit out of future school classroom to enable use as a playgroup space	5 years
Community support facility	Building fit out to provide office space and consulting rooms for community support services	5 years

3.2.8 Valuation of Land

Land required for projects identified in this DCP has had an estimate of value prepared by Charter Keck Cramer using the 'Public Land Equalisation Method' or PLEM.

Under this methodology the average land obligation for DCP land projects in each PSP has been calculated as a percentage of Net Developable Area. For the Clyde DCP, this results in an obligation as follows:

Amended by C208
- PSP 53 - 11.38% / NDA-R (residential)

Amended by C208
- PSP 53 - 9.32% / NDA-E (employment)

Amended by C208
- PSP 54 - 10.41% / NDA

Amended by C208
- PSP 57.1 - 2.6% / NDA

The land obligation for each property has been calculated against the PSP average as identified above. Obligations up to and including the average have an estimate of value on a per property broad hectare basis. Obligations above the average have an estimate of value on a site specific basis.

For the land obligation by each property that is 'under' and / or 'over' the average, refer to Table 13.

3.2.9 Concept designs and cost sheets

Concept designs and cost sheets have been prepared for each project. This information is included in the Appendices.

3.3 Cost Apportionment

The DCP apportions a charge to new development according to its expected use of identified infrastructure items. Since development contribution charges are levied 'up-front', a measure of actual use by individual development sites is not possible. Therefore costs must be shared in accordance with the estimated share of use.

This DCP calculates what each development type (residential, industrial or commercial) should pay towards provision of the identified infrastructure items. This is the total cost of the item (after deducting other funding sources and making allowance for any external demand) divided by total demand units of the development type.

To support this approach, a charge area has been determined for each item.

The balance of the cost of the items not recovered under this DCP will be funded from alternative sources.

3.3.1 Charge Areas

The DCP contains two charge areas. Charge Area 1 applies to land where residential development is to be located under the future urban structure (refer Plan 2). This includes the Local Town Centres, Convenience Centres, Major Town Centres, Mixed Use and Active Mixed Use.

Charge Area 2 applies to land designated for dedicated employment land - commercial use (outside town centres) and industrial use.

The variation between the residential and employment (industrial and commercial) charge area rates reflects the fact that employment land does not contribute towards community and local sports field items.

For each infrastructure project, the charge area that is to make the contribution is specified (refer Table 9).

3.3.2 Potential Non-Government Schools

The development of land for a potential non government school is exempt from the requirement to pay a development infrastructure levy and a community infrastructure levy under this Development Contribution Plan.

3.3.3 Schedule of Costs

Table 10 calculates the amount of contributions payable by each charge area for each infrastructure category.

3.3.4 Summary of Charges per Hectare

Table 10 shows the quantum of funds to be contributed by each charge area towards each infrastructure project. This adds up to the total amount of funds recoverable under the DCP.

Table 10 sets out a summary of costs for each charge area.

Table 1 provides a snapshot of the key costs and charges.

This page has been intentionally left blank.

4.0 DEVELOPMENT CONTRIBUTIONS PLAN ADMINISTRATION

This section sets out how this DCP will be administered and covers the timing of payment, provision of works and land in kind and how funds generated by this DCP will be managed in terms of reporting, indexation and review periods.

The DCP Development Infrastructure Levy applies to subdivision and / or development of land.

The DCP Community Infrastructure Levy applies to the construction of dwellings and must be paid prior to the issue of a Building Permit.

Council will be both the Collecting Agency and the Development Agency for the purposes of this DCP.

4.1 Payment of Contribution Levies and Payment Timing

4.1.1 Development Infrastructure

For subdivision of Land

- A development infrastructure levy must be paid to the Collecting Agency for the land within the following specified time, namely after certification of the relevant plan of subdivision but not more than 21 days prior to the issue of a Statement of Compliance with respect to that plan.
- Where the subdivision is to be developed in stages, the infrastructure levy for the stage to be developed may only be paid to the Collecting Agency within 21 days prior to the issue of a Statement of Compliance for that stage provided that a Schedule of Development Contributions is submitted with each stage of plan of subdivision. This Schedule must show the amount of the development contributions payable for each stage and the value of the contributions for prior stages to the satisfaction of the Collecting Agency.

If the Collecting Agency agrees to works or provision of land in lieu of the payment of the infrastructure levy, the land owner must enter into an agreement under Section 173 of the *Planning and Environment Act 1987* in respect of the proposed works or provision of land in lieu to specific requirements.

For development of land where no subdivision is proposed

- Provided a development infrastructure levy has not already been paid on subject land, an infrastructure levy must be paid to the Collecting Agency in accordance with the provisions of the approved DCP for each demand unit (Net Developable Hectare) proposed to be developed prior to the commencement of any development (i.e. development includes buildings, car park, access ways landscaping and ancillary components). The Collecting Agency may require that contributions be made at either the planning or building permit stage for Development Infrastructure.

If the Collecting Agency agrees to works or provision of land in lieu of the payment of the infrastructure levy, the land owner must enter into an agreement or other suitable arrangement under Section 173 of the *Planning and Environment Act 1987* in relation to the proposed works or land in lieu.

Where no planning permit is required

The following requirements apply where no planning permit is required. The land may only be used and developed subject to the following requirements being met:

- Unless otherwise agreed to by the Collecting Agency in a Section 173 agreement, a development infrastructure levy must be paid to the Collecting Agency prior to the commencement of any development in accordance with the provision of this approved Development Contributions Plan for the land.

If the Collecting Agency agrees to works or provision of land in lieu of the payment of the infrastructure levy, the land owner must enter into an agreement under Section 173 of the *Planning and Environment Act 1987* in respect of the proposed works or provision of land in lieu.

4.1.2 Community Infrastructure Levy

Contributions relating to community infrastructure are to be made by the home builder prior to the issue of a building permit. However, development proponents are encouraged to pay the levy prior to the issue of a statement of compliance to reduce the administrative burden of collection from individual home builders.

Levies for 'residential buildings' will be calculated at the rate for a single dwelling. In all other forms of accommodation, the dwelling is the individual unit (such as each dwelling in a residential village, retirement village, serviced apartment complexes and so on). Corrective institutions are exempt.

A community infrastructure levy is not payable for a dwelling on a lot which was created prior to the date that this DCP was first incorporated into the Casey Planning Scheme.

4.1.3 Works in Kind

The Collecting Agency may permit development proponents to undertake works in lieu of cash payments, providing that:

- The works constitute project(s) funded by this DCP.
- The Collecting Agency agrees that the timing of the works would be consistent with priorities in this DCP.
- The works are defined and agreed in a Section 173 agreement.
- Works must be provided to a standard that accords with this DCP to the satisfaction of the Development Agency, unless an alternative is agreed by both the Development Agency and the Collecting Agency.
- Detailed design must be approved by the Development Agency and the Collecting Agency and must generally accord with the expectations outlined in this DCP unless an alternative is agreed by both the Development Agency and the Collecting Agency.
- The construction of works must be completed to the satisfaction of the Development Agency and the Collecting Agency.
- There should be no negative financial impact on this DCP to the satisfaction of the Collecting Agency.
- In particular, the works will only be accepted in lieu of a financial contribution required by this DCP to the extent that they constitute part or all of the design of the infrastructure item and reduce the cost to complete that design, to the Collecting Agency's satisfaction. Temporary works will not be accepted as works in kind.

4.1.4 Credit for Over Provision

Where the Collection Agency agrees that a development proponent can physically provide an infrastructure item (either works and/or land) the situation may arise where the developer makes a contribution with a value that exceeds that required by the DCP for the individual project.

In such a case the developer may be entitled to credits against other projects in the DCP to the extent of the excess contribution. Alternatively, the developer may seek an agreement with the Collecting Agency to provide for a cash reimbursement where a significant over contribution has been made on a particular project.

The details of credits and reimbursements will need to be negotiated with, and agreed to by the Collecting Agency.

4.1.5 Land uses exempt from contributions

Where land is subdivided or developed for the purpose of a government school, non government school or any other use that is partly or wholly exempt from development contributions and the land is subsequently used for a purpose other than as one of those exempt uses, the owner of that land must pay to the Collecting Agency development contributions in accordance with the provisions of the DCP. The development infrastructure levy and where applicable, the community infrastructure levy must be paid within 28 days of the date of the commencement of the construction of any buildings or works for that alternative use.

4.2 Funds Administration

The administration of the contributions made under this DCP will be transparent and the levy contribution mode under this Development contributions plan will be held by collecting agency until required for provision of the item. Details of funds received and expenditures will be held by the Collecting Agency in accordance with the provisions of the *Local Government Act 1993* and the *Planning and Environment Act 1987*.

The administration of contributions made under this DCP will be transparent and demonstrate:

- The amount and timing of funds collected.
- The sources of the funds collected.
- The amount and timing of expenditure on specific projects.
- The project on which the expenditure was made.
- The account classes or individual project classes.
- Details of any works-in-kind arrangements for project provision.
- Any pooling or quarantining of funds to deliver specific projects where applicable.

The Collecting Agency will provide for regular monitoring, reporting and review of the monies received and expended in accordance with this DCP.

The Collecting Agency will establish interest bearing accounts and all monies held in these accounts will be used solely for the provision of infrastructure as specified in this DCP, as required under Section 46QB(2) of the *Planning and Environment Act 1987*.

Should the Collecting Agency achieve savings on any project, or resolve not to proceed with any of the infrastructure projects listed in this DCP, the funds collected for these items will be used for alternative works in the same infrastructure class as specified by this DCP. Such funds may also be used for the provision of additional works, services or facilities where approved by the Minister responsible for the *Planning and Environment Act*, or will be refunded to developers and / or owners of land subject to these infrastructure charges.

4.3 Construction and Land Value Costs Indexation

Capital costs of all infrastructure items (with the exception of land) are in 2014 dollars and will be indexed by the Collecting Agency quarterly to take account of inflation.

In relation to the costs of infrastructure items other than land, the cost must be adjusted according to the following methods:

- Roads, intersections and bridges – in line with the Australian Bureau of Statistics Producer Price Indexes, Road and Bridge Construction Index, Victoria.
- All other infrastructure items - in line with the Australian Bureau of Statistics Producer Price Indexes, Non-Residential Building Construction Index, Victoria.

Amended by C208

Land values will be adjusted on 1 July every year following a revaluation by a registered valuer of properties with land required by the DCP. Within 14 days of the revaluation, the Collecting Agency will publish the amended contributions on the Collecting Agency's website.

Community Infrastructure Levy projects are not indexed as the value of the contribution is set by the *Planning and Environment Act 1987*.

If in the future the Community Infrastructure Levy is amended, then the levy applicable to the release of any remaining dwellings may be adjusted in accordance with the revised legislative and regulatory approach as directed by the Minister for Planning.

4.4 Development Contributions Plan Review Period

This DCP adopts a long-term outlook for development. It takes into account planned future development in the Clyde area. A 'full development' horizon of land within the current Urban Growth Boundary within 30 years of gazettal of this DCP has been adopted.

This DCP commences on the date of incorporation into the Casey Planning Scheme. This DCP will end when development within the DCP area is complete, which is projected to be 30 years after gazettal, or when the DCP is removed from the Planning Scheme.

The DCP is expected to be revised and updated every 5 years (or more frequently if required). This will require an amendment to the Casey Planning Scheme to replace this document with an alternative, revised document. Any review will need to have regard to any arrangements (for example an agreement under s173 of the Act) for the implementation of this DCP.

4.5 Collecting Agency (Agency Responsible for Collecting Infrastructure Levy)

Casey City Council is the Collecting Agency pursuant to section 46K(1)(fa) of the *Planning and Environment Act 1987* which means that it is the public authority to whom all levies are payable. As the Collecting Agency, Casey City Council is also responsible for the administration of this DCP and also its enforcement pursuant to Section 46QC of the Act.

4.6 Development Agency (Agency Responsible for Works)

Casey City Council is the Development Agency and is responsible for the provision of all of the DCP projects identified in this DCP.

5.0 IMPLEMENTATION STRATEGY

This section provides further details regarding how the Collecting Agency intends to implement this DCP. In particular, this section clearly identifies the rationale for the implementation strategy and the details the various measures that have been adopted to reduce the risk posed by this DCP to all parties.

5.1 Rationale for the Implementation Strategy

This implementation strategy has been incorporated into this DCP to provide certainty to the Collecting Agency and development proponents. The implementation strategy recognises the complexities associated with infrastructure provision and funding and seeks to minimise risk to the Collection Agency, Development Agency, development proponent and future community.

The implementation strategy has been formulated by:

- Precinct Structure Plans.
- Having regard to the development context.
- Assessing the need for finance requirements – up front financing and pooling of funds.
- Agreeing the land value .
- Seeking direct delivery of infrastructure and land be development proponents where appropriate.
- Identifying preferred implementation mechanisms to achieve the above outcomes and reducing the risk associated with the DCP to ensure that it will be delivered as intended.
- Provision of adequate resources to administer this DCP.

5.2 Implementation Mechanism

Under Section 46P of the Act, the Collecting Agency may accept (with the consent of the Development Agency where the Collecting Agency is not also the Development Agency), the provision of land, works, services or facilities by the applicant in part of full satisfaction of the amount of levy payable. This can be agreed with the Collecting Agency before or after the application for the permit is made or before the development is carried out.

To coordinate the provision of infrastructure, it is proposed that the owner of all properties enter into an agreement under s173 of the Act to provide for provision of works in kind.

Through the approval of these agreements Casey City Council (acting as the Collecting Agency) will consider if and what infrastructure should be provided as in-kind works under this DCP in accordance with Section 46P of the Act. The agreement must include a list of the DCP infrastructure which the Collecting Agency has agreed in writing to allow to be provided as works in kind.

6.2 Glossary

Active Open Space

Land set aside for the specific purpose of formal/organised club based sports.

Activity Centre

See 'Town Centre'.

Arterial Road

A higher order road providing for moderate to high volumes at relatively high speeds typically used for inter-suburban journeys and linking to freeways, and identified under the Road Management Act 2004. All declared arterials are managed by the State Government.

Co-Location

Adjoining land uses to enable complementary programs, activities and services and shared use of resources and facilities. For example, the co-location of schools and active open space.

Community Facilities

Infrastructure provided by government or non-government organisations for accommodating a range of community support services, programs and activities. This includes facilities for education and learning (e.g. government and non-government schools, universities, adult learning centres); early years (e.g. preschool, maternal and child health, childcare); health and community services (eg. hospitals, aged care, doctors, dentists, family and youth services, specialist health services); community (e.g. civic centres, libraries, neighbourhood houses); arts and culture (e.g. galleries, museums, performance space); sport, recreation and leisure (e.g. swimming pools); justice (e.g. law courts); voluntary and faith (e.g. places of worship) and emergency services (e.g. police, fire and ambulance stations).

Connector Street

A lower order street providing for low to moderate volumes and moderate speeds linking local streets to the arterial network Managed by the relevant local council. (See Table C1 in clause 56)

Development Contributions Plan

Document that sets out the contributions expected from each individual landowner to fund infrastructure and services. Refer to Part 3B of the Planning and Environment Act 1987.

Encumbered Land / Service Open Space

Land that is constrained for development purposes. Includes easements for power/transmission lines, sewers, gas, waterways, drainage, retarding basins/wetlands, landfill, conservation and heritage areas. This land may be used for a range of activities (e.g. walking trails).

Freeway

A high speed and high volume road with the highest level of access control and typically used for longer distance journeys across the metropolitan area and country Victoria. All freeways are managed by VicRoads.

Growth Area

Areas on the fringe of metropolitan Melbourne around major regional transport corridors that are designated for large-scale change, over many years from rural to urban use. Melbourne has six growth areas called Casey-Cardinia; Hume; Melton-Caroline Springs; Whittlesea, Wyndham and Mitchell.

Growth Corridor Plan

Government document that sets long-term strategic planning direction to guide the creation of a more sustainable community in the growth areas.

High Density Housing

Housing with an average density of more than 30 dwellings per net developable hectare.

Housing Density (Net)

The number of houses divided by net developable area

Linear Open Space Network

Corridors of open space, mainly along waterways that link together, forming a network.

Land Budget Table

A table setting out the total precinct area, net developable area and constituent land uses proposed within the precinct.

Lot

A part (consisting of one or more pieces) of any land (except a road, a reserve, or common property) shown on a plan, which can be disposed of separately and includes a unit or accessory unit on a registered plan of strata subdivision and a lot or accessory lot on a registered cluster plan.

Lower Density Housing

Housing with an average density of less than 10 dwellings per hectare.

Major Employment Area

Areas identified on the Growth Corridor Plan for economic and employment growth.

Major Town Centre

Town centres that have similar characteristics to Principal Town Centres, but serve smaller catchment areas.

Medium Density Housing

Housing with an average density of 16 to 30 dwellings per net developable hectare.

Native Vegetation

Plants that are indigenous to Victoria, including trees, shrubs, herbs, and grasses.

Net Developable Area

Total amount of land within the precinct that is made available for development of housing and employment buildings, including lots, local and connector streets. Total precinct area minus community facilities, schools and educational facilities and open space, arterial roads and encumbered land. Small local parks defined at subdivision stage are included in net developable area.

Net Developable Area - Residential (NDA-R)

As per net developable area but excluding dedicated employment land.

Net Developable Area - Employment (NDA-E)

The net developable area of dedicated employment land but excluding dedicated residential land.

Passive Open Space

Open space that is set aside for parks, gardens, linear corridors, conservation bushlands, nature reserves, public squares and community gardens that are made available for passive recreation, play and unstructured physical activity including walking, cycling, hiking, revitalisation, contemplation and enjoying nature.

Precinct Structure Plan

A statutory document that describes how a precinct or series of sites within a growth area will be developed over time. A precinct structure plan sets out the broad environmental, social and economic parameters for the use and development of land within the precinct.

Principal Public Transport Network

A high-quality public transport network that connects Principal and Major Activity Centres, and comprises the existing radial fixed-rail network, extensions to this radial network and new cross-town bus routes.

Public Open Space

Land that is set aside in the precinct structure plan for public recreation or public resort, or as parklands, or for similar purposes. Incorporates active and passive open space.

Town Centre

Provide the focus for services, commercial and retail based employment and social interaction. They are where people shop, work, meet, relax and live. They are well-served by public transport, they range in size and intensity of use. In the growth areas, these are referred to as principal activity centres, major activity centres, neighbourhood activity centres and local centres.

Urban Growth Boundary

A statutory planning management tool used to set clear limits to metropolitan Melbourne's urban development.

Urban Growth Zone

Statutory zone that applies to land that has been identified for future urban development. The UGZ has four purposes: (1) to manage transition of non-urban land into urban land; (2) to encourage development of well-planned and well-serviced new urban communities in accordance with an overall plan; (3) to reduce the number of development approvals needed in areas where an agreed plan is in place; and (4) to safeguard non-urban land from use and development that could prejudice its future urban development.

E	PROJECT BUDGET										
	Total Estimate	**$ 8,227,299**	**$ 4,603,976**	**$ 4,270,344**	**$ 6,129,078**	**$ 3,698,176**	**$ 3,938,444**	**$ 4,437,766**	**$ 4,146,897**	**$ 3,363,945**	**$ 3,022,305**

Notes:

Shown thus	**Intersection affected by Aboriginal Cultural heritage sensitivity model**										
	Intersection with associated culverts		BR-53-01	BR-53-02	BR-53-03		BR-53-04				

Due to flat topography of the area, no major cut/fill works have been included for road

Substations
1 No allowance for substations

Preliminaries
2 Based on nominal rates

Subsoil Drain
3 Assume same as kerb and channel

Side Entry Pits
4 Based on 50 m intervals

Tactile Pavers
5 Assume hazard TGSI's (no directional)

Signing
6 Nominal rate

Pavement
7 Assume deep lift ashpalt pavement

Tree Removal
8 Based on preliminary information

Roads
9 Where applicable, existing road conditions based on limited crushed rock roads assumed to be of no consequence to works
10 Where applicable, existing asphalt roads to be demolished as part of intersection works

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

9 Crushed rock reclaimed from existing pavements to be reused

8

10 Based on preliminary information

9

10 Assume all existing asphalt roads to be demolished and FCR stockpiled
Option of the 28,550 m^2 pavement, there is 7,140 m^2 of the existing pavement that may be able to be retained; this is not priced

13 Assume crushed rock pavement will be removed as part of general earthworks

9.6	Electrical connection	1	Item	$ 17,500	$ 17,500	

PRELIMINARY ESTIMATE OF DEVELOPMENT COSTS **20 August 2015**
CG130898 **Version 8.1**
Clyde PSP - Intersection Cost Estimate
Intersection Ref: **IN-53-02**
Amended design as per VicRoads and MPA comments Sep 2014
Sheet Ref: **T03**

ITEM	DESCRIPTION	QUANTITY	UNIT	RATE	AMOUNT	SUBTOTAL
10	**LANDSCAPING WORKS**					$ 38,110
10.1	Topsoiling seeding	4,484	m²	$ 8.50	$ 38,110	
11	**SIGNING**	1	item	$ 7,500	$ 7,500	$ 7,500
12	**LINEMARKING (Thermoplastic)**	1	item	$ 25,000	$ 25,000	$ 25,000
13	**SERVICE RELOCATION**					$ 300,000
13.1	Water, gas, telstra (adopted allowance)	1	Item	$ 150,000	$ 150,000	
13.2	Overhead electrical (adopted allowance)	1	Item	$ 150,000	$ 150,000	
14	**MISCELLANEOUS**					$ -
15	**PROVISIONAL SUM - DAYWORK**		item		$ -	$ -
	TOTAL A - C				$ 4,072,748	**$ 4,072,748**
D	**Contingency**					
	Contingency (15% of C)				15%	$ 531,227.96
E	**PROJECT BUDGET**					
	Total Estimate					$ 4,603,976

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

Roads

9 Existing road conditions based on limited crushed rock roads running E-W assumed to be of no consequence to works

D	**Contingency**					
	Contingency (15% of C)				15%	$ 426,712.61
E	**PROJECT BUDGET**					
	Total Estimate					$ 3,698,176

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

Roads

9 Existing road conditions based on limited crushed rock roads running E-W assumed to be of no consequence to works

E	**PROJECT BUDGET**					
	Total Estimate					$ 4,146,897

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

9

13.2	Overhead electrical (adopted allowance)	1	Item	$ 150,000	$ 150,000	
14	**MISCELLANEOUS**					$ -
15	**PROVISIONAL SUM - DAYWORK**		item		$ -	$ -
	TOTAL A - C				$ 3,980,510	**$ 3,980,510**
D	**Contingency**					
	Contingency (15% of C)				15%	$ 519,196.93
E	**PROJECT BUDGET**					
	Total Estimate					$ 4,499,707

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

9

E	**PROJECT BUDGET**					
	Total Estimate					$ 3,008,176

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

Roads

9 Existing road conditions based on limited crushed rock roads running E-W assumed to be of no consequence to works

15	**PROVISIONAL SUM - DAYWORK**		item		$ -	$ -
	TOTAL A - C				$ 3,673,360	**$ 3,673,360**
D	**Contingency**					
	Contingency (15% of C)				15%	$ 479,133.96
E	**PROJECT BUDGET**					
	Total Estimate					$ 4,152,494

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

Roads

9 Existing road conditions based on limited crushed rock roads running E-W and NW-SE assumed to be of no consequence to works

	Contingency (15% of C)				15%	$ 280,644.67
E	**PROJECT BUDGET**					
	Total Estimate					$ 2,432,254

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Demolition of existing structures /buildings etc within current properties not included

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

9 Crushed rock reclaimed from existing pavements to be reused

10 Based on preliminary information

10 Assume all existing asphalt roads to be demolished
Option of the 21,815 m^2 pavement, there is 13,663 m^2 of the existing pavement that may be able to be retained; this is not priced

13 Assume crushed rock pavement will be removed as part of general earthworks

PRELIMINARY ESTIMATE OF DEVELOPMENT COSTS **20 August 2015**
CG130898 **Version 8.1**
Clyde PSP - Intersection Cost Estimate
Intersection Ref: **IN-54-05**
Amended design as per VicRoads and MPA comments Sep 2014
Sheet Ref: **T23**

ITEM	DESCRIPTION	QUANTITY	UNIT	RATE	AMOUNT	SUBTOTAL
10	**LANDSCAPING WORKS**					$ 34,405
10.1	Topsoiling seeding	4,048	m²	$ 8.50	$ 34,405	
11	**SIGNING**	1	item	$ 7,500	$ 7,500	$ 7,500
12	**LINEMARKING (Thermoplastic)**	1	item	$ 25,000	$ 25,000	$ 25,000
13	**SERVICE RELOCATION**					$ 300,000
13.1	Water, gas, telstra (adopted allowance)	1	Item	$ 150,000	$ 150,000	
13.2	Overhead electrical (adopted allowance)	1	Item	$ 150,000	$ 150,000	
14	**MISCELLANEOUS**					$ -
15	**PROVISIONAL SUM - DAYWORK**		item		$ -	$ -
	TOTAL A - C				$ 3,064,969	**$ 3,064,969**
D	**Contingency**					
	Contingency (15% of C)				15%	$ 399,778.57
E	**PROJECT BUDGET**					
	Total Estimate					$ 3,464,748

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

Roads

9 Existing road conditions based on limited crushed rock roads running E-W assumed to be of no consequence to works

CG130898 **Version 8.1**
Clyde PSP - Intersection Cost Estimate
Intersection Ref: **IN-54-08**
Amended design as per VicRoads and MPA comments Sep 2014
Sheet Ref: **T26**

ITEM	DESCRIPTION	QUANTITY	UNIT	RATE	AMOUNT	SUBTOTAL
10	**LANDSCAPING WORKS**					$ 85,548
10.1	Topsoiling seeding	10,064	m²	$ 8.50	$ 85,548	
11	**SIGNING**	1	item	$ 7,500	$ 7,500	$ 7,500
12	**LINEMARKING (Thermoplastic)**	1	item	$ 25,000	$ 25,000	$ 25,000
13	**SERVICE RELOCATION**					$ 300,000
13.1	Water, gas, telstra (adopted allowance)	1	Item	$ 150,000	$ 150,000	
13.2	Overhead electrical (adopted allowance)	1	Item	$ 150,000	$ 150,000	
14	**MISCELLANEOUS**					$ -
15	**PROVISIONAL SUM - DAYWORK**		item		$ -	$ -
	TOTAL A - C				$ 4,626,948	**$ 4,626,948**
D	**Contingency**					
	Contingency (15% of C)				15%	$ 603,514.92
E	**PROJECT BUDGET**					
	Total Estimate					$ 5,230,463

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

Roads

9 Existing road conditions based on limited crushed rock roads running N-S and E-W assumed to be of no consequence to works

13.1	Water, gas, telstra (adopted allowance)	1	Item	$ 150,000	$ 150,000	
13.2	Overhead electrical (adopted allowance)	1	Item	$ 150,000	$ 150,000	
14	**MISCELLANEOUS**					$ -
15	**PROVISIONAL SUM - DAYWORK**		item		$ -	$ -
	TOTAL A - C				$ 2,932,266	**$ 2,932,266**
D	**Contingency**					
	Contingency (15% of C)				15%	$ 382,469.51
E	**PROJECT BUDGET**					
	Total Estimate					$ 3,314,736

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

Roads

9 Existing road conditions based on limited crushed rock roads running N-S assumed to be of no consequence to works

	Contingency (15% of C)				15%	$ 760,984.76
E	**PROJECT BUDGET**					
	Total Estimate					$ 6,595,201

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

8 Based on preliminary information

9 Assume all existing asphalt roads to be demolished and FCR stockpiled

10 Assume crushed rock pavement will be removed as part of general earthworks

13

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

8 Based on preliminary information

9 Assume all existing asphalt roads to be demolished and FCR stockpiled

10 Assume crushed rock pavement will be removed as part of general earthworks

13

8 Based on preliminary information

9 Assume all existing asphalt roads to be demolished and FCR stockpiled

10 Assume crushed rock pavement will be removed as part of general earthworks

13

	Total Estimate					$ 2,631,917

Notes:

- Due to flat topography of the area, no major cut/fill works have been included for road

Substations

1 No allowance for substations

Preliminaries

2 Based on nominal rates

Subsoil Drain

3 Assume same as kerb and channel

Side Entry Pits

4 Based on 50 m intervals

Tactile Pavers

5 Assume hazard TGSI's (no directional)

Signing

6 Nominal rate

Pavement

7 Assume deep lift ashpalt pavement

Tree Removal

8 Based on preliminary information

9

	Total Estimate per linear metre					$ 4,102.75

NOTES

SERVICES	No allowance for sewer
SUBSTATIONS	No allowance for substations or undergrounding of the power
SERVICE ROAD	No allowance made for 12m service road
PRELIMINARIES	based on nominal rates
SUB SOIL DRAIN	assume same as kerb and channel
SIDE ENTRY PITS	based on 50 m intervals
TACTILE PAVERS	assume hazard tgsi's (no directional)
SIGNING	nominal rate
LIGHT POLES	based on 75m intervals assume all single arm

Note:
1. Estimate could be reduced by salvaging components of existings road
2. Cost estimates reflect the construction of a road length of approximately 500m

NOTES

SERVICES	No allowance for sewer
SUBSTATIONS	No allowance for substations or undergrounding of the power
PAVEMENT	Parking bays have same pavement
Planting in parking bays	Without frequency or stds we ave allowed to run pavement through to provide a concervative estimate
PRELIMINARIES	based on nominal rates
SUB SOIL DRAIN	assume same as kerb and channel
SIDE ENTRY PITS	based on 50 m intervals - drainage has cross road drains at pits
TACTILE PAVERS	assume hazard tgsi's (no directional)
SIGNING	nominal rate
LIGHT POLES	based on 75m intervals assume all single arm

Note:

1. Cost estimates reflect the construction of a road length of approximately 500m

7.7 Interim culvert costings

Attention: Ms. Alexandrea Malishev

Dear Alexandrea,

RE: CLYDE DCP – ACTIVE RECREATION PROJECTS
MPA REFERENCE NO: COR/13/9502

As requested, we have prepared a cost study for the Development Contribution Plan for the above project, based on information received by us up to 15 October 2014.

Our estimate of the anticipated total cost is $56,534,443 for a fixed price contract at July 2014 cost levels and a summary follows:

Playing Fields		
AR_53_01A Thompsons Road Precinct – AOS1	$	4,230,904
AR_53_02A Thompsons Road Precinct – AOS2	$	3,322,104
AR_53_03A Thompsons Road Precinct – AOS3	$	6,479,827
AR_54_01A Clyde Creek Precinct – AOS1	$	4,252,802
AR_54_02A Clyde Creek Precinct – AOS2	$	6,462,530
AR_54_03A Clyde Creek Precinct – AOS3	$	5,479,052
AR_54_04A Clyde Creek Precinct – AOS4	$	4,071,846
AR_54_05A Clyde Creek Precinct – AOS5	$	7,290,832
Pavilions		
AR_53_01B Thompsons Road Precinct – AOS1 – Pavilion	$	1,435,896
AR_53_02B Thompsons Road Precinct – AOS2 – Pavilion	$	1,435,896
AR_53_03B Thompsons Road Precinct – AOS3 – Pavilion	$	2,122,313
AR_54_01B Clyde Creek Precinct – AOS1 – Pavilion	$	1,435,896
AR_54_02B Clyde Creek Precinct – AOS2 – Pavilion	$	3,520,440
AR_54_03B Clyde Creek Precinct – AOS3 – Pavilion	$	2,122,313
AR_54_04B Clyde Creek Precinct – AOS4 – Pavilion	$	1,435,896
AR_54_05B Clyde Creek Precinct – AOS5 – Pavilion	$	1,435,896
Anticipated Total Project Cost (Excluding GST) (Fixed Price Contract – July 2014)	**$**	**56,534,443**

Allowances for the following have been included in our estimate:

- Preliminaries and Design variable
- Cost escalation to a tender date of July 2014
- Cost escalation during construction
- Competitive tendering
- Design fees (5% as advised)
- Project management and supervision (10% as advised)
- Contingency (20% as advised)

Allowances for the following have been excluded from our estimate:

- Goods & Services Tax
- Cost escalation to tender after July 2014
- Authority contribution and headwork charges
- Adverse market conditions and rock excavation
- Abnormal ground conditions
- Loose furniture and equipment
- Hazardous material removal

This estimate is based on preliminary information. Assumptions have been made and these assumptions will require confirmation when further documentation becomes available.

We have attached the following documents for your information:
- Appendix A: Explanatory Notes (Ref G)
- Appendix B: Stage A Cost Plans (Ref G)

Yours faithfully
PROWSE QUANTITY SURVEYORS PTY LTD

EXPLANATORY NOTES:

Definition of Measurement of Building Area

- Fully Enclosed Covered Area (FECA)

The sum of all such areas at all building floor levels, including basement (except unexcavated portions), floored roof spaces and attics, garages, penthouses, enclosed porches and attached enclosed covered way alongside buildings, equipment rooms, lift shafts, vertical ducts, staircases and any other fully enclosed spaces and usable area of the building, computed by measuring from the normal inside face of exterior walls but ignoring any projections such as plinths, columns, piers and the like which project from the normal inside face of exterior walls.

It shall not include open courts, light wells, connecting or isolated covered ways and net open areas of upper portions of rooms, lobbies, halls, interstitial spaces and the like which extend through the storey being computed.

- Unenclosed Covered Area (UCA)

The sum of all such areas at all building floor levels, including roofed balconies, open verandahs, porches and porticos, attached open covered way alongside buildings, undercrofts and usable space under buildings, unenclosed access galleries (including ground floor) and any other trafficable covered areas of the building which are not totally enclosed by full height walls, computed by measuring the areas between the enclosing walls or balustrade (ie from the inside face of the UCA excluding the wall or balustrade thickness).
When the covering element (ie roof or upper floor) is supported by columns, is cantilevered or is suspended, or any combination of these, the measurements shall taken to the edge of the paving or to the edge of the cover, whichever is the lesser.

UCA shall not include eves overhangs, sun shading, awnings and the like where these do not relate to clearly defined trafficable covered areas, nor shall it include connecting or isolated covered ways.

- Gross Floor Area (GFA)

The sum of the "Fully Enclosed Area" and "Unenclosed Covered Area" as defined.

- Building Area (BA)

The total enclosed and unenclosed area of the building at all building floor levels measured between the normal outside face of any enclosing walls, balustrades and supports.

EXPLANATORY NOTES (Cont'd)

Building Costs per square meter

- The estimates provided are all-up estimates of the construction costs, they include allowance for labours, material, equipment, builder's preliminaries and overheads and profits.

- We have assumed the compliance of current building codes and Australian Standards would be the minimum requirement of the development. The development should achieve Council's expectation of standard quality and finishes of similar public assets.

- We have assumed the tender procurement for each development is through a competitive tendering process with no less than three selected tenderers to participate.

- We have assumed the form of contracting is an Australian Standard lump sum contract, such as AS4000.

- We have allowed for cost escalation to an anticipated tender date as noted. The estimates include cost escalation during the construction period of the development.

- A 5% of "Design Fees" has been allowed for in our cost estimates as per MPA's instruction

- A 10% of "Project Management & Supervision" cost has been allowed for in our cost estimates as per MPA's instruction.

- A 20% of "Contingency" has been allowed for in our cost estimates as per MPA's instruction.

- The estimates exclude Goods and Services Tax (G.S.T)

- The estimates exclude cost associated with utilities connection, authority contribution and headworks charges

- The estimates exclude cost associated with working in significant sloping site, rock excavation and site decontamination.

- The estimates exclude allowance for loose furniture and equipment.

- The estimates are prepared based on the previous DCP costing that PQS involved in, such as Armstrong Creek East DCP, Armstrong Creek West DCP, Armstrong Creek Horseshoe Bend DCP, Ballarat West DCP, and also cost plans prepared for various local councils including City of Boroondara, Melton City Council, City of Port Phillip, Frankston City Council etc.

Melbourne VIC 3000

Attention: Ms. Alexandrea Malishev

Dear Alexandrea,

RE: CLYDE DCP – COMMUNITY PROJECTS
MPA REFERENCE NO: COR/13/9508

As requested, we have prepared a cost study for the Development Contribution Plan for the above project, based on information received by us up to 4 March 2014.

Our estimate of the anticipated total cost is $30,269,274 for a fixed price contract at July 2014 cost levels and a summary follows:

Thompson's Road Precinct		
CO_53_01 Family and Children's Centre (Level 1)	$	4,324,182
CO_53_04 Family and Children's Centre (Level 1)	$	4,324,182
Clyde Creek Precinct		
CO_54_01 Family and Children's Centre (Level 1)	$	4,324,182
CO_54_02 Family and Children's Centre (Level 1)	$	4,324,182
CO_54_03 Family and Children's Centre (Level 1)	$	4,324,182
CO_54_04 Family and Children's Centre (Level 1)	$	4,324,182
CO_54_06 Family and Children's Centre (Level 1)	$	4,324,182
Anticipated Total Project Cost (excluding GST) (Fixed Price Contract – July 2014)	**$**	**30,269,274**

Allowances for the following have been included in our estimate:

- Preliminaries and Design variable
- Cost escalation to a tender date of July 2014
- Cost escalation during construction
- Competitive tendering
- Design fees (5% as advised)
- Project management and supervision (10% as advised)
- Contingency (20% as advised)

Allowances for the following have been excluded from our estimate:

- Goods & Services Tax
- Cost escalation to tender after July 2014
- Authority contribution and headwork charges
- Adverse market conditions and rock excavation
- Abnormal ground conditions
- Loose furniture and equipment
- Hazardous material removal

This estimate is based on preliminary information. Assumptions have been made and these assumptions will require confirmation when further documentation becomes available.

We have attached the following documents for your information:
- Appendix A: Explanatory Notes (Ref C)
- Appendix B: Stage A Cost Plans (Ref C)

Yours faithfully
PROWSE QUANTITY SURVEYORS PTY LTD

JOE YEH

APPENDIX

'A'

EXPLANATORY NOTES:

Definition of Measurement of Building Area

- Fully Enclosed Covered Area (FECA)

The sum of all such areas at all building floor levels, including basement (except unexcavated portions), floored roof spaces and attics, garages, penthouses, enclosed porches and attached enclosed covered way alongside buildings, equipment rooms, lift shafts, vertical ducts, staircases and any other fully enclosed spaces and usable area of the building, computed by measuring from the normal inside face of exterior walls but ignoring any projections such as plinths, columns, piers and the like which project from the normal inside face of exterior walls.

It shall not include open courts, light wells, connecting or isolated covered ways and net open areas of upper portions of rooms, lobbies, halls, interstitial spaces and the like which extend through the storey being computed.

- Unenclosed Covered Area (UCA)

The sum of all such areas at all building floor levels, including roofed balconies, open verandahs, porches and porticos, attached open covered way alongside buildings, undercrofts and usable space under buildings, unenclosed access galleries (including ground floor) and any other trafficable covered areas of the building which are not totally enclosed by full height walls, computed by measuring the areas between the enclosing walls or balustrade (ie from the inside face of the UCA excluding the wall or balustrade thickness).
When the covering element (ie roof or upper floor) is supported by columns, is cantilevered or is suspended, or any combination of these, the measurements shall taken to the edge of the paving or to the edge of the cover, whichever is the lesser.

UCA shall not include eves overhangs, sun shading, awnings and the like where these do not relate to clearly defined trafficable covered areas, nor shall it include connecting or isolated covered ways.

- Gross Floor Area (GFA)

The sum of the "Fully Enclosed Area" and "Unenclosed Covered Area" as defined.

- Building Area (BA)

The total enclosed and unenclosed area of the building at all building floor levels measured between the normal outside face of any enclosing walls, balustrades and supports.

EXPLANATORY NOTES (Cont'd)

Building Costs per square meter

- The estimates provided are all-up estimates of the construction costs, they include allowance for labours, material, equipment, builder's preliminaries and overheads and profits.

- We have assumed the compliance of current building codes and Australian Standards would be the minimum requirement of the development. The development should achieve Council's expectation of standard quality and finishes of similar public assets.

- We have assumed the tender procurement for each development is through a competitive tendering process with no less than three selected tenderers to participate.

- We have assumed the form of contracting is an Australian Standard lump sum contract, such as AS4000.

- We have allowed for cost escalation to an anticipated tender date as noted. The estimates include cost escalation during the construction period of the development.

- A 5% of "Design Fees" has been allowed for in our cost estimates as per MPA's instruction

- A 10% of "Project Management & Supervision" cost has been allowed for in our cost estimates as per MPA's instruction.

- A 20% of "Contingency" has been allowed for in our cost estimates as per MPA's instruction

- The estimates exclude Goods and Services Tax (G.S.T)

- The estimates exclude cost associated with utilities connection, authority contribution and headworks charges

- The estimates exclude cost associated with working in significant sloping site, rock excavation and site decontamination.

- The estimates exclude allowance for loose furniture and equipment.

- The estimates are prepared based on the previous DCP costing that PQS involved in, such as Armstrong Creek East DCP, Armstrong Creek West DCP, Armstrong Creek Horseshoe Bend DCP, Ballarat West DCP, and also cost plans prepared for various local councils including City of Boroondara, Melton City Council, City of Port Phillip, Frankston City Council etc.
